AGRICULTURE IN MAZOWIECKIE VOIVODSHIP IN 2015

When publishing Statistical Office data please indicate the source.

Source of information were results of surveys conducted in 2015 concerning land use, sown area, consumption of mineral or chemical and lime fertilizers, result estimation of yields and production of field and garden crops and livestock.

Data have been compiled on the basis of random sample surveys carried out in private farms, collective results of reporting from agricultural holdings of legal persons and organizational units without legal personality as well as on the basis of assessment and professional evaluation of CSO experts.

Area, production and yields of potatoes, ground vegetables and strawberries, as well as fruit-bearing trees and shrubs and berry fruit plantations are given jointly with crops from kitchen gardens. In 2015, data on area and yields of fruit-bearing trees and shrubs and berry fruit plantations include only their cultivation in orchards; whereas data on production also include their cultivation outside orchards.

Data was presented according to the seat of the holder. Data on area under vegetables and fruit were based on estimate of experts who made their evaluation according to the location of land.

Due to the use of electronic rounding method, in some cases sums of figures (expressed in absolute and relative numbers) might slightly differ from the amount given in a 'total' item. The figures are content-wise correct.

* * *

Agricultural market in 2015, in comparison with 2014, recorded:

- an increase in the number of agricultural holdings, at a simultaneous increase in their average area;
- an increase in acreage of agricultural land and an increase of their average area;
- an increase in sown area and a greater number of holdings dealing with crop output;
- an increase in area under crops, among others, total cereals, basic cereals with cereal mixed, rape and turnip rape, potatoes and edible pulses, whereas a decrease in acreage of sugar beets;
- an increase in the number of cattle, sheep and poultry in total, a decrease in the number of pigs;
- in the structure of total cattle stock an increase in the share of calves aged under 1 year and cattle aged 1–2 years and a decrease in the share of adult cattle, of which cows;
- in the herd of pigs a decrease in the share of piglets and pigs for breeding, whereas an increase in the share of boars and porkers;
- a decrease in consumption of mineral and lime fertilizers.

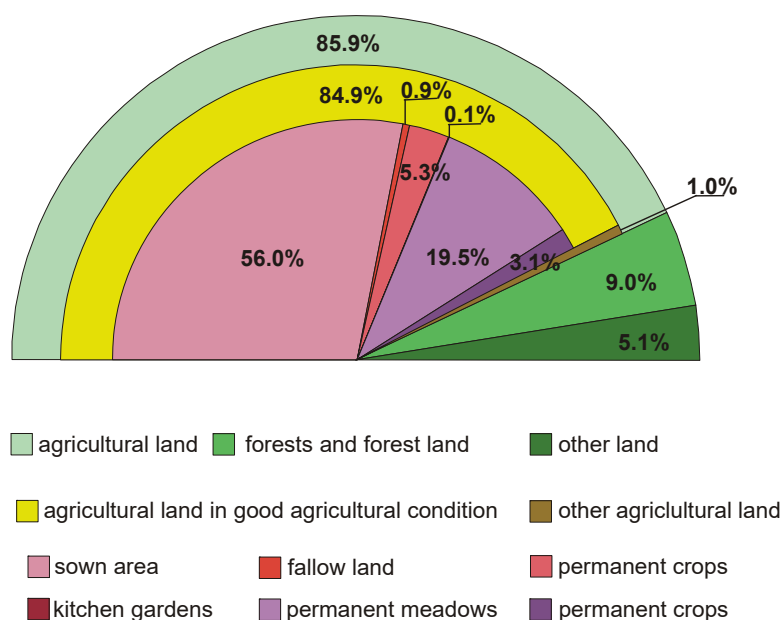

LAND USE

In 2015, a total area of agricultural holdings, whose holders had a seat in the territory of Mazowieckie voivodship, amounted to 2248.8 thousand ha and compared with data for 2014 was larger by 87.8 thousand ha, i.e. by 4.1%. Private farms held 2206.6 thousand ha, in other words over 98% of the total area of agricultural holdings belonged to them.

The agricultural land area covered 1931.2 thousand ha and compared with 2014 increased by 45.6 thousand ha (2.4%) and its share in the total area of agricultural holdings accounted for 85.9%. From the total area of the land in question – 98.9% (1909.0 thousand ha) was maintained in good agricultural condition, and 1.1% (22.2 thousand ha) covered agricultural land excluded from agricultural output.

In 2015, total area of permanent crops stood at 119.2 thousand ha and made up 6.2% of agricultural land area. In the total area of permanent crops significant share belonged to orchards, which covered area of 111.3 thousand ha, representing 93.3% of permanent crops area and 5.8% of agricultural land area.

Structure of land use in agricultural holdings in 2015

Permanent green land covered the area of 507.6 thousand ha and made up 26.3% of agricultural land area, of these permanent meadows – 22.7%, permanent pastures – 3.6%.

Fallow land area in agricultural holdings amounted to 19.4 thousand ha, i.e. 1.0% of agricultural land area.

In Mazowieckie voivodship in 2015, an overall number of agricultural holdings which possessed agricultural land amounted to 214.3 thousand, of these the number of private farms stood at 214.1 thousand. In the total number of holdings — 99.7% (213.6%) represented units where agricultural land area amounted to over 1 ha. In the group of these holdings 43.3% were holdings with 1–5 ha of agricultural land, 48.6% — holdings with 5–20 ha of agricultural land, 6.7% — holdings with 20–50 ha of agricultural land and 1.3% — holdings with 50 ha and more of agricultural land.

Average area of an agricultural holding in 2015, amounted to 10.49 ha, and of a private farm 10.31 ha; in 2014, it was 10.31 ha and 10.14 ha respectively. An average area of agricultural land per one agricultural holding was estimated at 9.01 ha and was by 0.01 ha bigger than a year before.

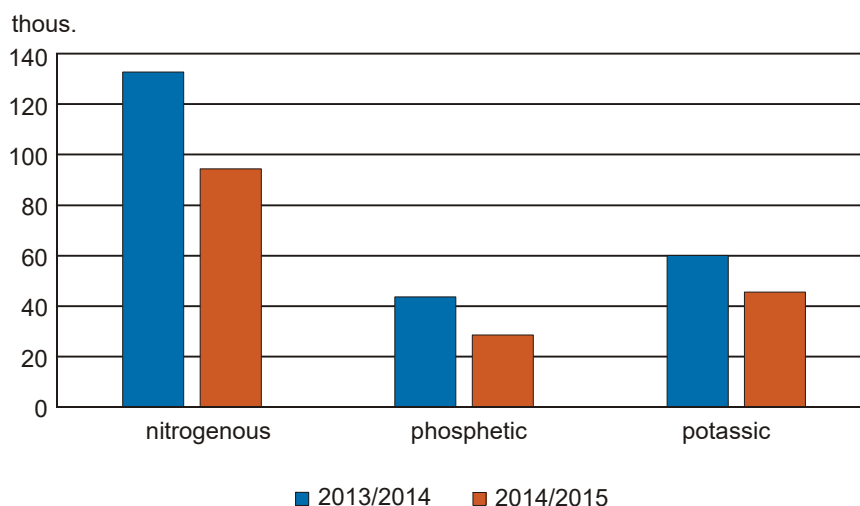

Agricultural holdings by area groups of agricultural land.

MEANS OF PRODUCTION

In 2015 in Mazowieckie voivodship, there were 168.6 thousand tonnes of mineral fertilizers used under crops in terms of pure ingredient, i.e. by 67.8 thousand tonnes (by 28.7%) less than a year before.

Consumption of mineral fertilizers

Average consumption of mineral fertilizers per 1 ha of agricultural land amounted to 87.3 kg NPK, of which per 1 ha of agricultural land in a good agricultural condition 88.3 kg (in the 2013/14 farming year – 125.4 and 126.5 kg respectively).

In the total consumption of mineral fertilizers in terms of pure ingredient, nitrogen (N) represented 56.0%, phosphorus (P₂O₅) — 17.0%, and potassium (K₂O) — 27.1% (in the previous year: 56.1%, 18.5% and 25.4% respectively).

In the farming year 2014/2015, mineral fertilizers were being used in 154.9 thousand agricultural holdings (over 72% of total holdings possessing agricultural land), of these majority, i.e. 85.5% of holdings used nitrogenous fertilizers. Other fertilizers were being used to a lesser extent (respectively: mixed fertilizers — 56.4% of holdings applying mineral fertilizers, potassic — 9.3%, phosphatic — 7.7% and).

Lime fertilizers in 2015 were being applied by 20.7 thousand of agricultural holdings, i.e. 9.6% of total holdings. Consumption of lime fertilizers (CaO) amounted to 34.4 thousand tonnes and was by 44.7% smaller than in the farming year 2013/14). Per 1 ha of agricultural land on average in Mazowieckie voivodship 33.0 kg were used, of these per 1 ha of agricultural land in good agricultural condition — 18.0 kg).

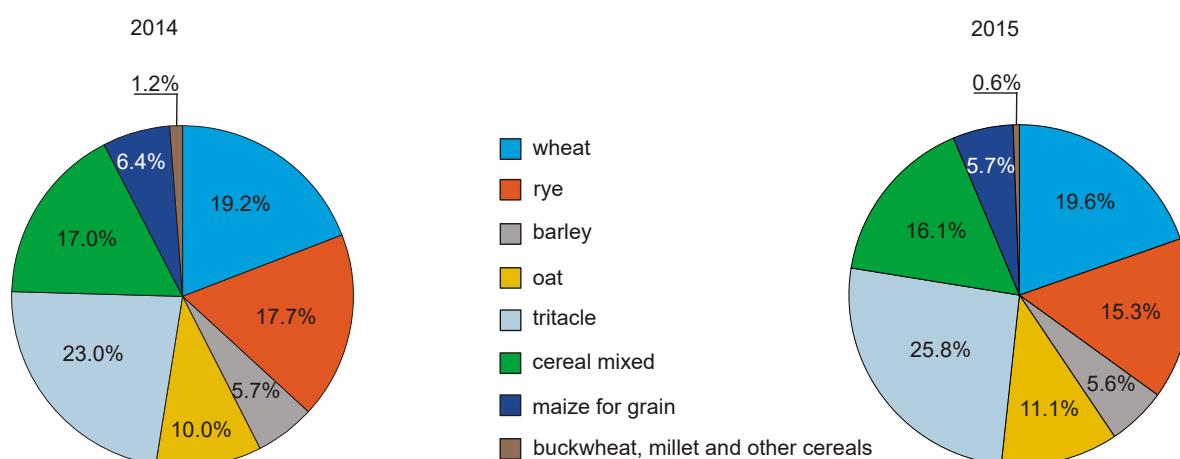

CROP PRODUCTION

In 2015, number of agricultural holdings with sown area reached 180.8 thousand, which represented 84.4% of total agricultural holdings. Compared with 2014, the number of these holdings increased by 3.2%.

Total sown area in 2015 amounted to 1259.8 thousand ha and was by 66.4 thousand ha (5.6%) larger than in 2014. In the total sown area the largest acreage — 920.4 thousand ha, i.e. 73.1% represented total cereals. Their area was larger than in the previous year by 4.6%, of these basic cereals with cereal mixed by 6.0%. In the structure of sown area of cereals the share of triticale increased (by 2.8 pp), oat (by 1.1 pp) and wheat (by 0.4 pp), and reduced the share of rye, cereal mixed, maize for grain, buckwheat, millet and other cereals, as well as barley (by 2.4 pp, 0.9 pp, 0.7 pp, 0.6 pp, 0.1 pp respectively).

In comparison with the previous year increased the sown area, among others, of edible pulses by (171.9%), rape and turnip rape (by 9.5%) and potatoes (by 6.4%), whereas sugar beets decreased by 7.2%.

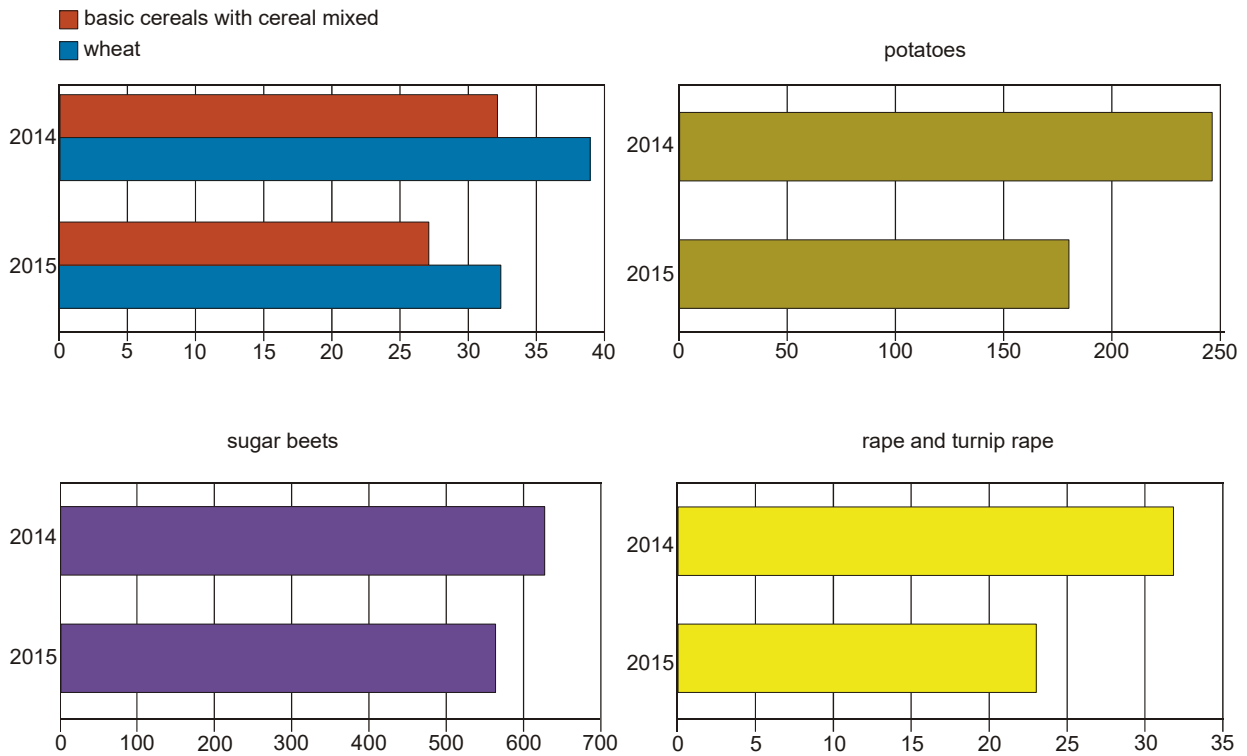

Structure of sown area of cereals

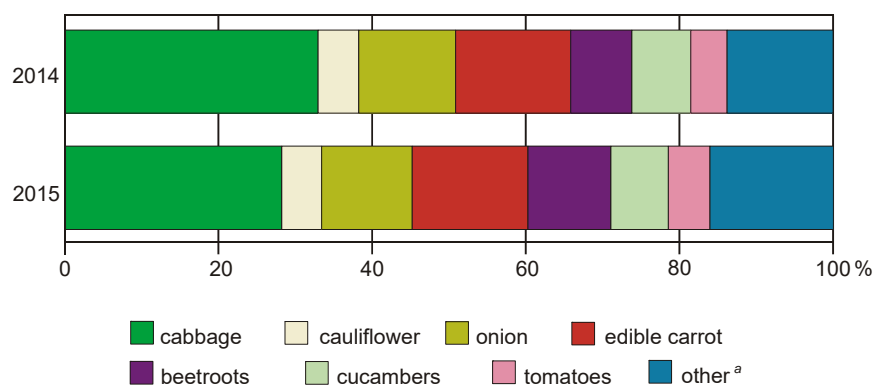

In comparison with 2014, despite an increase in sown area, a decrease was observed in crops: total cereal — by 12.4%, of which basic with cereal mixed — 10.6%, rape and turnip rape total — by 20.7%, potatoes — by 22.4% and ground vegetables — by 31.8%.

In 2015, a total of 1608.8 thousand tonnes of fruit from trees, i.e. by 1.6% more than a year before. In the structure of tree fruit production dominated apples which made up 92.1%. Apple production compared with 2014 was higher by 2.5%, while plum production lower — by 11.9%, sweet cherries — by 10.7%, cherries — by 6.6% and pears — by 6.4%.

Yields of main crops (in dt/ha)

Structure of ground vegetables production

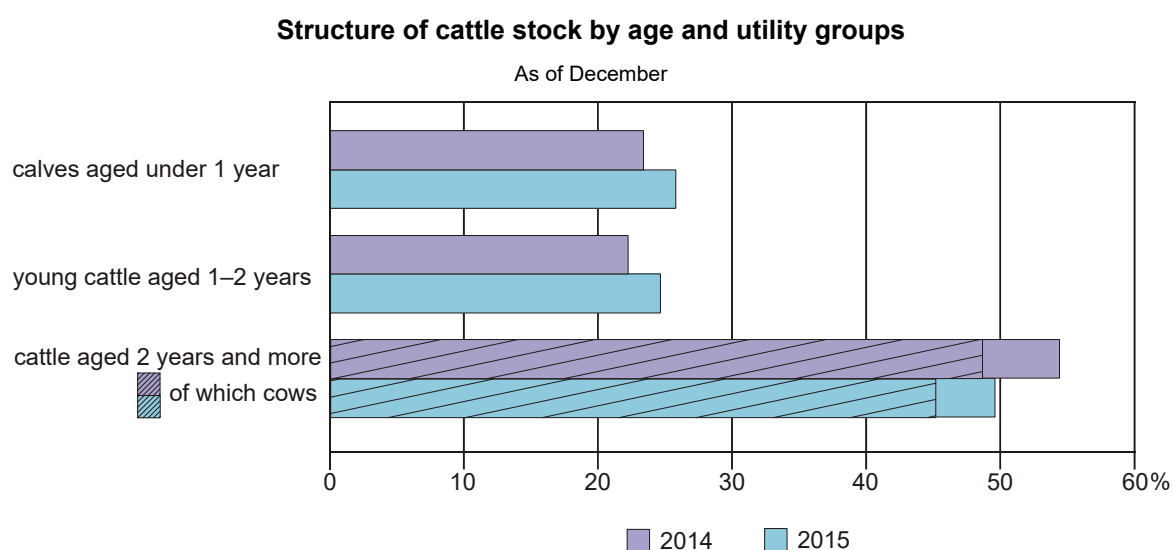

^a Parsley, leeks, celeries, radish, lettuce, rhubarb and other.

LIVESTOCK

In December 2015, total cattle stock amounted to 1091.0 thousand heads and increased by 47.7 thousand heads (4.6%) compared with the analogous period of 2014. Cow stock in the analysed period stood at 492.5 thousand heads and decreased compared with December 2014 (by 14.4 thousand heads 2.8%). Private sector maintained 99.7% of cattle stock in the voivodship, of which private farms – 99.4%. In the structure of total cattle stock over a year, the share of calves aged under 1 year and young cattle aged 1–2 years increased (by 2.4 pp each), whereas the share of adult cattle aged 2 years and over decreased (by 4.8 pp), of which cows (by 3.5 pp).

Total number of cattle, of which cows, per 100 ha of agricultural land amounted to 56.5 and 25.5 heads respectively at 55.4 and 26.9 heads respectively in December 2014.

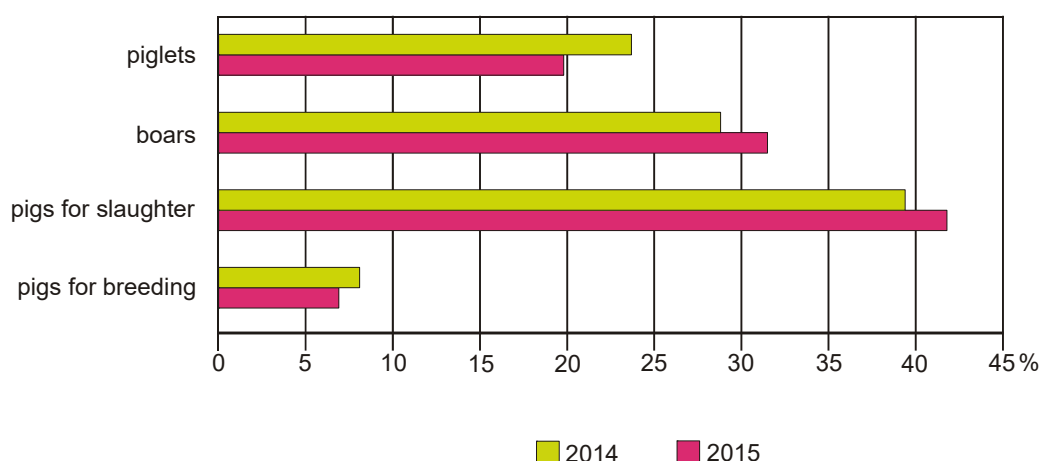

Pig stock as of December 2015 amounted to 895.2 thousand heads and decreased by 3.1 thousand heads compared with the previous year (by 50.8 thousand heads, i.e. 5.4%). Herd of sows for breeding in the analysed period amounted to 60.1 thousand heads, i.e. 15.7 thousand heads fewer (20.7%) than in December 2014. Private sector maintained nearly 100% of the voivodship pig stock, of these private farms — 96.1%.

Compared with the structure of pig stock registered in December 2014, the share of boars increased (by 2.7 pp) and pigs for slaughter with a weight of 50 kg or more (by 2.4 pp), while share of piglets went down (by 3.9 pp) as well as pigs for breeding with a weight of 50 kg or more (by 1.2 pp).

Total pig stock, of which sows for breeding, per 100 ha of agricultural land amounted to 46.4 heads and 3.1 heads, and in December 2014 — 50.2 heads and 4.0 heads respectively.

Structure of pig stocks by production and utility groups

As of December

Sheep stock in December 2015, amounted to 5.9 thousand heads and increased compared with the previous year (by 0.1 thousand heads, i.e. 2.4%). Private sector maintained 99.5% of the voivodship sheep stocks, of these private farms — 99.1%. In the structure of sheep stock, 68.1% represented ewes and their population increased by 17.2% over a year. Number of sheep per 100 ha of agricultural land, similarly as in the previous year, stood at 0.3 heads.

Poultry stock in total (aged over 2 weeks) in December 2015 amounted to 26277.8 thousand heads and was bigger by 2073.6 thousand heads (8.6%) compared with December 2014. Private sector kept nearly 100% of the voivodship poultry stock, of these private farms – 92.4%. In the structure of total poultry stock 95.2% made up hen poultry, of which laying hens — 33.5%). Number of total poultry per 100 ha of agricultural land amounted to 1361 heads, at 1284 in December 2014.
