**PRELIMINARY ESTIMATE OF GROSS DOMESTIC PRODUCT  
IN MAZOWIECKIE VOIVODSHIP IN 2012**

When publishing Statistical Office data please indicate the source.

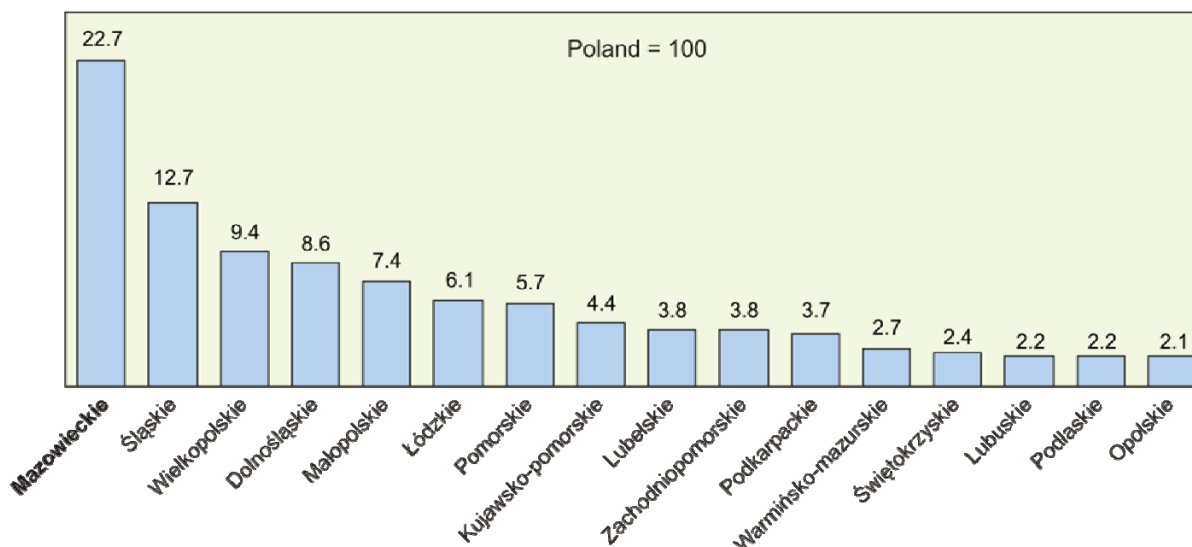

Data for 2012 are preliminary and they can be changed upon updating of the source data as well as due to bringing the methodology for the calculation of regional accounts more in line with the new European System of National and Regional Accounts (ESA 2010). Final data for 2012 will be published in October 2014.

Adopted methods of regionalisation in principle do not differ from the ones used in elaboration of annual data on gross domestic product and its elements in the regional perspective. Differences result from using in the preliminary estimate certain methodological simplifications, stemming from the limited availability of certain sources of data for particular groups of entities of the national economy. A list of data sources used in the calculations can be found in the brief information 'Preliminary estimate of Gross Domestic Product by voivodships in 2012 (experimental elaboration)', published on the website: [http://www.stat.gov.pl/gus/5840\\_15346\\_PLK\\_HTML.htm](http://www.stat.gov.pl/gus/5840_15346_PLK_HTML.htm).

\*

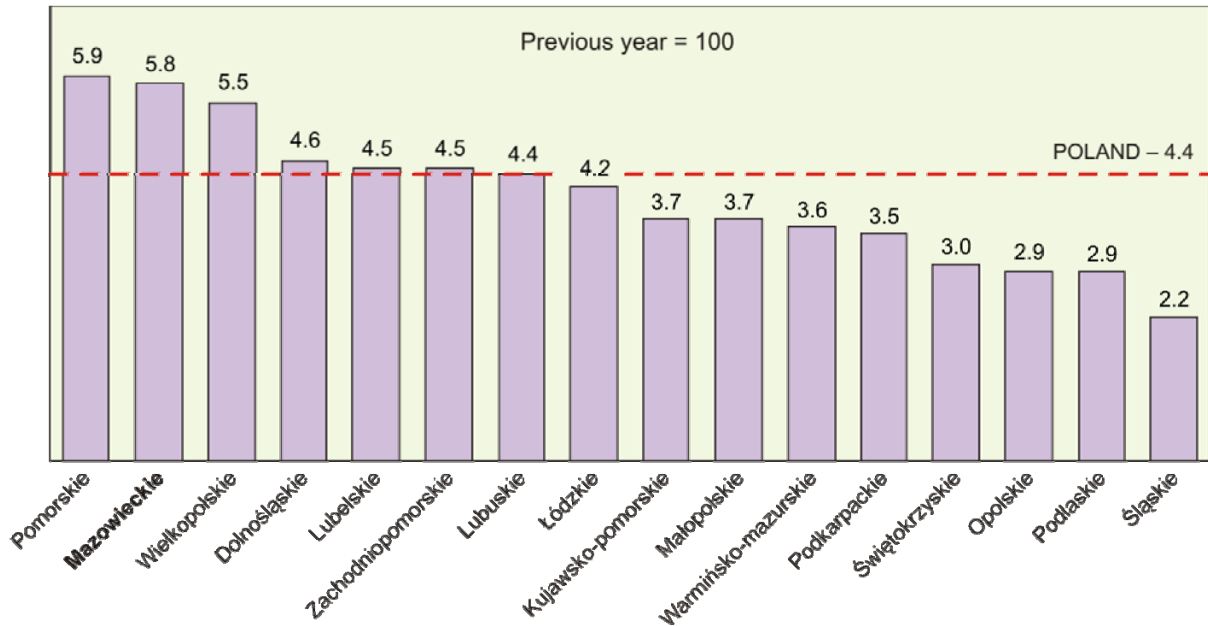

Mazowieckie voivodship is the region which generates the largest share of the gross domestic product (GDP), illustrating the end result of the activity of all entities of national economy. According to preliminary data, in 2012 the share of Mazowieckie voivodship in generating GDP was 22.7% and it was almost 11 times larger than the share of the voivodship with the smallest share (Opolskie). In comparison with 2011 this share has increased by 0.3 percentage points. At the same time it is worth stressing that an increase of share has been registered in only two more voivodships (Wielkopolskie and Pomorskie – in both by 0.1 percentage points).

**Share of voivodships in generating gross domestic product in 2012 (current prices)**

The value of GDP generated in Mazowieckie voivodship in 2012 amounted to 361524 million zlotys and in comparison to the preceding year it was (in current prices) higher by 5.8%. It was one of the largest increases of GDP in the country, higher than the average growth rate by 1.4 percentage points; a higher increase occurred only in Pomorskie voivodship – by 5.9%.

### Increase of the gross domestic product by voivodships in 2012 (current prices)

In 2012 the gross domestic product per 1 inhabitant (*GDP per capita*) in Mazowieckie voivodship amounted to 68299 zlotys and it was 5.4% higher than a year earlier. Since many years, Mazowieckie voivodship has been achieving the highest level of this indicator in Poland – in 2012 it was 65.0% (26901 zlotys) above the national average; in 2011 it was higher by 63.3%. Apart from Mazowieckie, only three other voivodships surpassed the national average, but to a much smaller degree. *GDP per capita* registered in our voivodship was almost 2.5 times higher than in the voivodship with the lowest value of this indicator (Podkarpackie – 27719 zlotys).
