**PRELIMINARY ESTIMATE OF GROSS DOMESTIC PRODUCT
IN MAZOWIECKIE VOIVODSHIP IN 2014**

When publishing Statistical Office data please indicate the source.

Presented data are preliminary and will be subject to revision due to revision policy applied in national and regional accounts. Final data for 2014 will be published in October 2016.

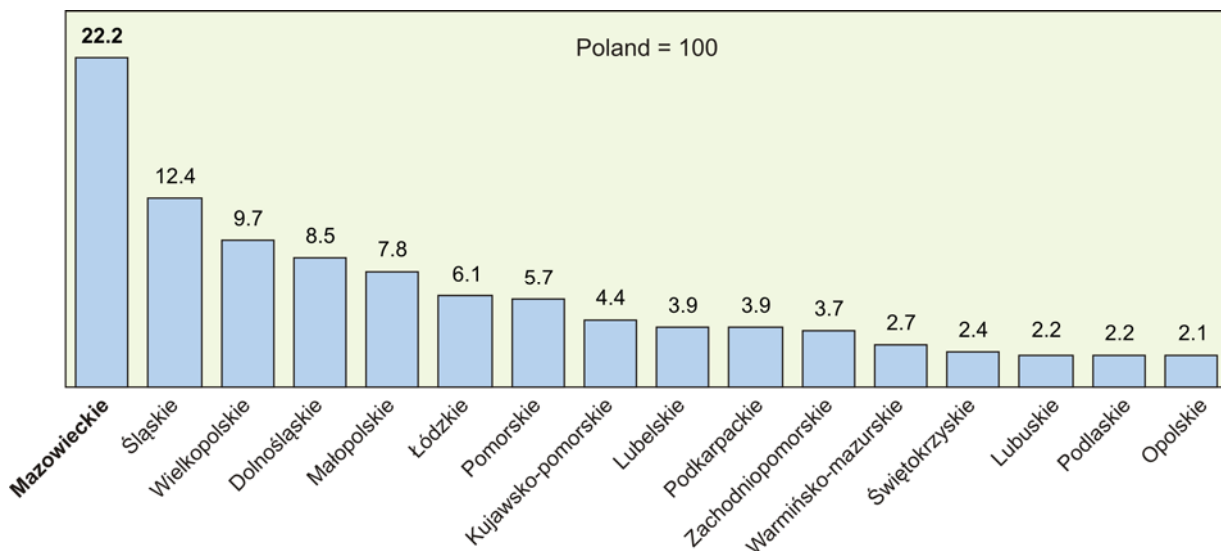

Data were compiled according to the principles of the "European System of Account (ESA 2010)", introduced by Regulation No. 549/2013 of the European Parliament and of the Council (EU) of 21 V 2013 on the European system of national and regional accounts in the European Union (Official Journal of the EU L 174, 26.06. 2013).

Adopted methods of regionalisation in principle do not differ from the ones used in elaboration of final data on gross domestic product and its elements in the regional perspective. Differences result from using in the preliminary estimate certain methodological simplifications, stemming from the limited availability of sources of data for some groups of entities of the national economy. Methodological notes concerning basic concepts and methods of data compilation might be found in publication "Gross Domestic Product – Regional Accounts in 2013", Katowice 2015.

* *
*

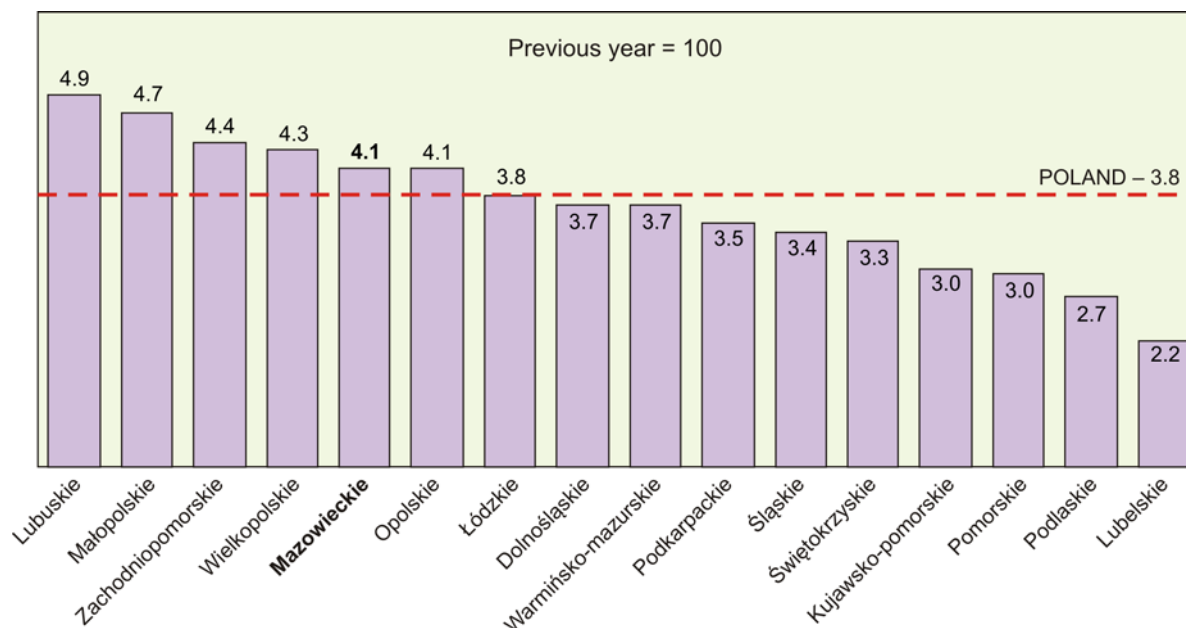

Mazowieckie voivodship is the region which generates the largest share of the gross domestic product (GDP), illustrating the final result of the activity of all entities of national economy. According to preliminary data, in 2014 the share of Mazowieckie voivodship in generating GDP was 22.2% and it was over 10 times larger than the share of the voivodship with the smallest share (Opolskie). In comparison with 2013 this share increased by 0,1 p. p. At the same time it is worth stressing that an increase of share has been registered in only two other voivodships (Wielkopolskie and Małopolskie – in both by 0.1 p. p. as well).

Share of voivodships in generating gross domestic product in 2014 (current prices)

The value of GDP generated in Mazowieckie voivodship in 2014 amounted to 381559 mln zł and in comparison to the previous year it was (in current prices) higher by 4.1%. The increase was higher than the average growth rate in the country by 0.3 p. p.; the highest increase occurred in Lubuskie voivodship – by 4.9%.

Increase of the gross domestic product by voivodships in 2014 (current prices)

In 2014 the gross domestic product per 1 inhabitant (*GDP per capita*) in Mazowieckie voivodship amounted to 71661 zł and it was 3.8% higher than a year earlier. For many years, Mazowieckie voivodship has been achieving the highest level of this indicator in Poland – in 2014 it was 60.4% (26991 zł) above the national average; in 2013 it was higher by 60.5%. Apart from Mazowieckie, only three other voivodships surpassed the national average, but to a much smaller degree. *GDP per capita* registered in our voivodship was over 2 times higher than in the voivodship with the lowest value of this indicator (Lubelskie – 31233 zł).
