**PRELIMINARY ESTIMATE OF GROSS DOMESTIC PRODUCT  
IN MAZOWIECKIE VOIVODSHIP IN 2015**

When publishing Statistical Office data please indicate the source.

Presented data are preliminary and will be subject to revision due to revision policy applied in national and regional accounts. Final data for 2015 will be published in October 2017.

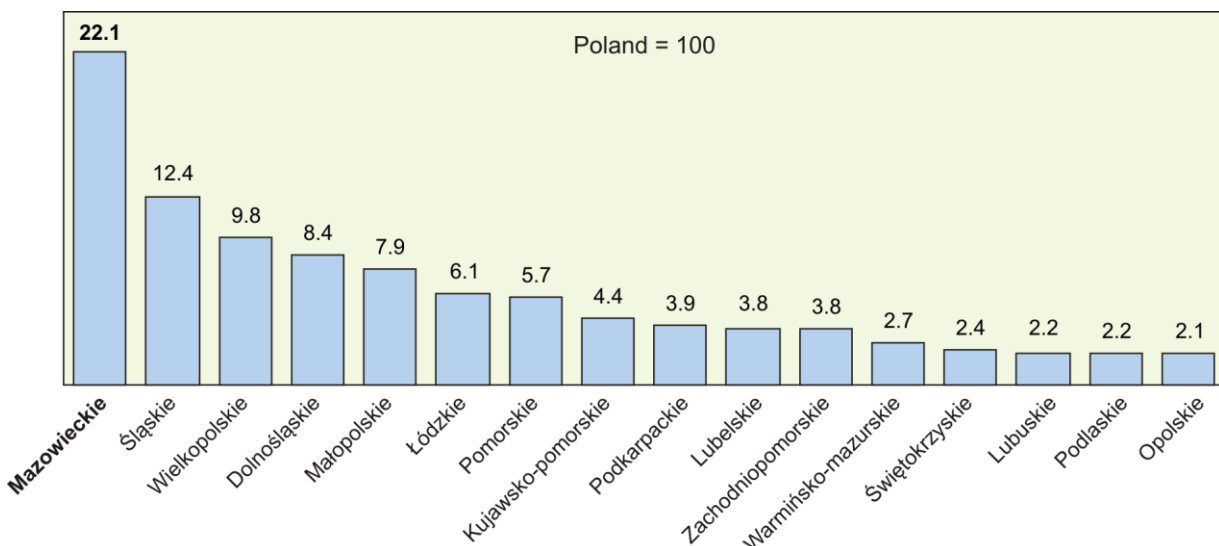

Data were compiled according to the principles of the "European System of Account (ESA 2010)", introduced by Regulation No. 549/2013 of the European Parliament and of the Council (EU) of 21 V 2013 on the European system of national and regional accounts in the European Union (Official Journal of the EU L 174, 26.06. 2013).

Adopted methods of regionalisation in principle do not differ from the ones used in elaboration of final data on gross domestic product and its elements in the regional perspective. Differences result from using in the preliminary estimate certain methodological simplifications, stemming from the limited availability of sources of data for some groups of entities of the national economy.

\* \*  
\*

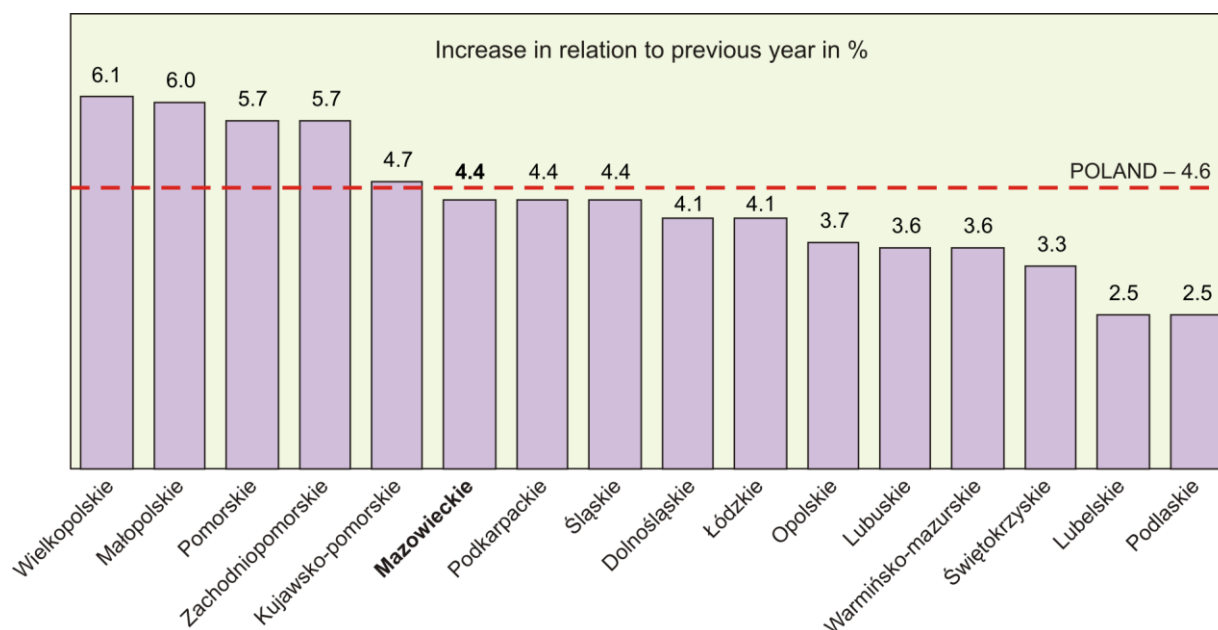

Mazowieckie voivodship is the region which generates the largest share of the gross domestic product (GDP), illustrating the final result of the activity of all entities of national economy. According to preliminary data, in 2015 the share of Mazowieckie voivodship in generating GDP was 22.1% and it was over 10 times larger than the share of the voivodship with the smallest share (Opolskie). In comparison with 2014 this share decreased by 0,1 pp. At the same time it is worth stressing that an decrease of share has been registered in two other voivodships (Dolnośląskie and Lubelskie – in both by 0.1 pp as well).

**Share of voivodships in generating gross domestic product in 2015 (current prices)**

The value of GDP generated in Mazowieckie voivodship in 2015 amounted to 398158 mln zł and in comparison to the previous year it was (in current prices) higher by 4.4%. The increase was lower than the average growth rate in the country by 0.2 pp; the highest increase occurred in Wielkopolskie voivodship – by 6.1%.

### Gross domestic product by voivodships in 2015 (current prices)

In 2015 the gross domestic product per 1 inhabitant (GDP *per capita*) in Mazowieckie voivodship amounted to 74550 zł and it was 4.0% higher than a year earlier. For many years, Mazowieckie voivodship has been achieving the highest level of this indicator in Poland – in 2015 it was 59.4% (27786 zł) above the national average; in 2014 it was higher by 60.4%. Apart from Mazowieckie, only three other voivodships surpassed the national average, but to a much smaller degree. GDP *per capita* registered in our voivodship was over 2 times higher than in the voivodship with the lowest value of this indicator (Lubelskie – 32063 zł).
