## Selected purposes of using the Internet in private matters in the last 3 months

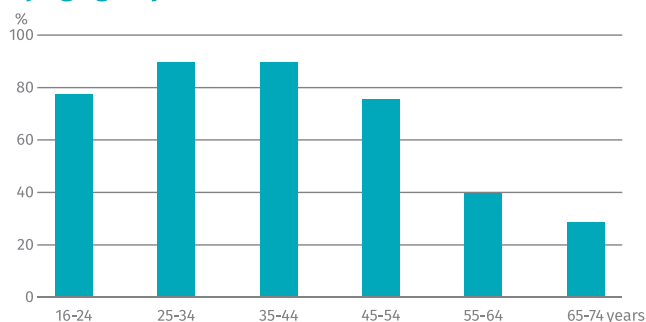

## Persons ordering or buying goods and services online for private use

in % of the total persons in a given group

total

by age groups

The information was prepared on the basis of the results of the research "Use of information and communication technologies in households and among individuals", carried out every year in April and May. Data presented in the "last 3 months" system refer to the months preceding the survey. The study concerns people aged 16-74 and the share of these people in the total number of people at this age.
