of which, for the purpose of searching for information on public administration websites

2016 **30.1%** 2023 **40.1%** 

The information was prepared on the basis of the results of the survey "Use of information and communication technologies in households and among individuals", carried out every year in April and May. Data presented in the "last 3 months" format refer to the months preceding the survey. The survey concerns persons aged 16-74 and the share of these persons in the total number of persons of this age.
